Soft & Hardscape Design

AL SULAITEEN GARDENS Landscape Services takes pride in our work. Our crews are professionally trained to provide the highest quality of landscape Design in the industry. **AL SULAITEEN GARDENS** Landscape Services provides all of your landscape construction needs. In good landscape design, both soft landscaping and hard landscaping are essential elements and both need consideration. A landscape can appear incomplete, and it can't perform many of the functions that good landscaping can without both hard and soft materials present. Offering a professional maintenance service matching with our designs for all the systems we install. By implementing regular maintenance schedules helps to keep project growing and improving accordingly. We offer a fully integrated management system from design phase to make achievement of measurable criteria approved jointly between the clients and ourselves.

It's always a good idea to consult with **AL SULAITEEN GARDENS** to give you some ideas of the essential components which will complete your garden design.

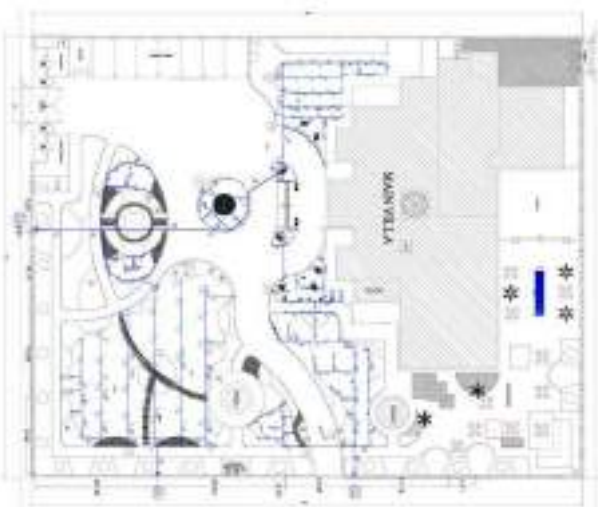

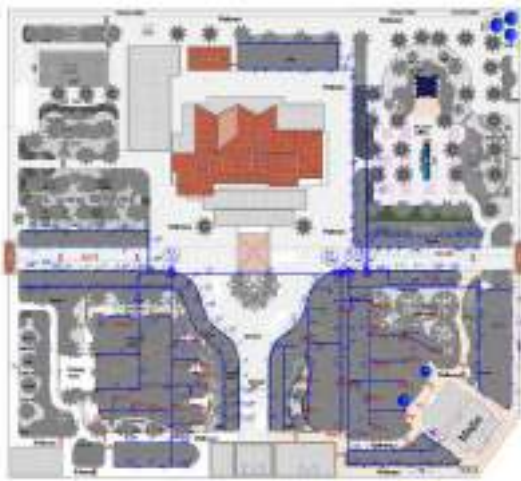

Irrigation Design

Our crew are planning to save water by using less time shifts to meet the plants requirements with smart irrigation designs to make it an irrigation system is easy and inexpensive. Designing an irrigation system is a complex task due to the large number of factors involved in the process.

AL SULAITEEN GARDENS are more than happy to help If you are struggling to figure out how to plan an irrigation system for your garden.

Landscape Construction Soft & Hardscape

AL SULAITEEN GARDENS Landscape Services takes pride in our work. Our crews are professionally trained to provide the highest quality of landscape construction in the industry. WE ARE providing all of your landscape construction needs. A landscape can appear incomplete, and it can't perform many of the functions, But with us we are studying how to use all items and elements on your garden, take caring about the wind, sun direction and shadows calculated from soft landscaping and hard landscaping materials integrated each other's such as walkways with trees and flowers , parking areas with shades , backyards and gardens accessories like fountains fencing system, Borders, BBQ, setting areas considering the privacy and quality for long run grantee's of all materials are supplies and installed without both hard and soft materials present. Balance between the hard and soft is needed for the whole. Much like how hardware and software are both needed to create a computer.

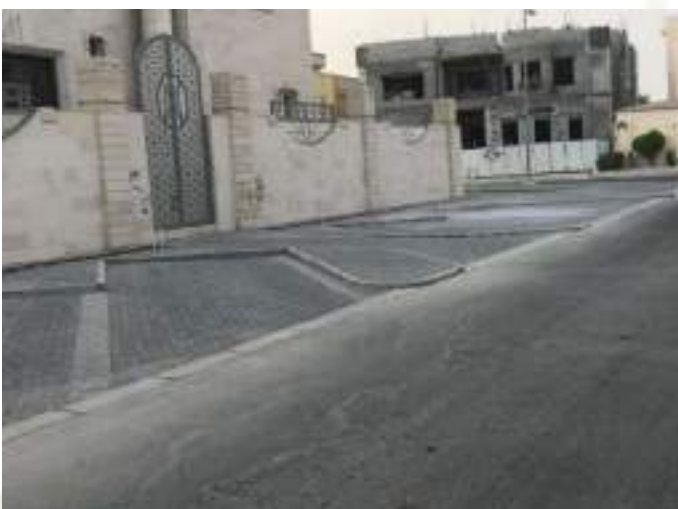

Car Parking Construction

Parking structures have become important elements in your property development. The car park is the first building many visitors come into contact with and first impressions really counts.

AL SULAITEEN GARDENS specializes good car park design that includes attributes like: Uncomplicated and logical flow around the car park, spacious, safe & secure.

Football Fields Construction & Maintenance

We **AL SULAITEEN GARDENS** provide our customers with many possible options that best suit their requirements, to enhance and beautify their surroundings for playing. The better you regularly maintain your football field, the longer it will last. Simple economics, but often forgotten.

AL SULAITEEN GARDENS offers a variety of maintenance regimes to suit all types of surface. We do the general inspection and service work that should be carried out in a most effective way. The more frequently this maintenance and inspection work is carried out, the simpler the system-related maintenance work will be.

Irrigation Construction

AL SULAITEEN GARDENS has the experienced in all types of irrigation for lawn and garden. We are experts in the installation and maintenance of irrigation and systems for sporting fields, passive recreation areas, lawns and landscapes. We offer irrigation works services that are admired due to reasonable cost, hassle-free management, perfect execution, and client-focused approach.

Irrigation Construction has been one of the expertise we do for years in full range of services that combine our experience with the latest technology and craftsmanship. We have set the standard for irrigation by never being too comfortable with the status quo, developing new ideas, and applying those solutions that differentiate us in valuable ways to make ease maintenance.

Softscape Maintenance

Irrigation Maintenance

Even the best irrigation system can waste water if it is run too long or operated incorrectly. You might be able to save water by regularly maintaining your irrigation system. We at **AL SULAITEEN GARDENS** tests your irrigation system periodically to make sure it's operating correctly

Our teams are experts in understanding soil types and weather issues and will make irrigation suggestions accordingly. We can also diagnose and repair any problems before they permanently affect your system or your landscape. With regular irrigation system maintenance your sprinklers will last longer, be more efficient, and give your landscape more accurate watering.

Our Nursery

AL SULAITEEN Agricultural Farm, located in Umm Salal Ali, occupies an area of 40 hectares and is designed in a scientific way to include all agricultural activities utilizing the latest technologies of production. A well established and maintained nursery, grooming rooms, single and multi-plan cooled greenhouses with an area of 12,00m², shade net houses and our research & development department. Our engineers are constantly looking for new ideas and developments around the world in the agricultural industry. Their job is to spot ideas that might have the potential to work in Qatar's climate and to find out if they can be applied locally to increase production or reduce costs and natural resources required.

Quality & Time Policy Objective

Al Sulaiteen Gardens aims to achieve customer satisfaction by striving to complete all projects as per the agreed program to the highest possible standards while meeting all necessary contractual requirements within agreed time.

The Management believes that the successful Implementation of Quality Management System and time fact is the key for achieving the above objectives.

All personnel in the organization are directed to contribute to the Enhancement of customer satisfaction through the implementation of the company Project Quality Plan.

The Management is committed to comply with the requirements of this standard and continually develop and improve its effectiveness.

Safety First Policy & Priorities

AL SULAITEEN GARDENS have a commitment to job site safety, and we believe that worker protection is an important element in the company's success and is a trust between **AL SULAITEEN GARDENS**, employees and the clients. Our excellent safety procedure demonstrates our dedication to the highest level of job site safety and quality assurance.

The comprehensive safety procedures implemented by **AL SULAITEEN GARDENS** are designed to meet the specific

requirements for the installation. We fully adopt the Health and Safety regulations and standards (2nd edition 2003) as laid out by the Ports Customs Free Zone Corporation (PCFC), and instruct, inform and guide all individuals of the general systems that are needed in the workplace to protect employees from potential risks / hazards that may cause any form of harm.

To ensure that working conditions are acceptable and to in still AWARENESS – of potential risks and hazards, as well as safety standards and safe working procedures to prevent any possible incidents.

Introduction to our Program

AL SULAITEEN GARDENS policy makes the safety and health of our employees the first consideration in the operation of our business. It is the intent of **AL SULAITEEN GARDENS** to comply with all the laws concerning the operation of the business and the health and safety of our employees and the public. To work within ethic Corporate Governance and consideration of all those around us.

We strive to be aware of the conditions in all work arenas that can produce or lead to injuries. No employee is required to work at a job known to be unsafe or dangerous to their health. Cooperation in detecting hazards, reporting dangerous conditions and controlling workplace hazards is a condition of employment. Employees are taught to inform their supervisor immediately of any situation beyond their ability or authority to correct. Employees will not be disciplined or suffer any retaliation for reporting a safety violation in good faith.

Safety First Priority

The personal safety and health of each employee of **AL SULAITEEN GARDENS** is of primary importance. Presentation of occupationally induced injuries and illnesses is of such significance that it will be given precedence over operation productivity. To the highest degree possible, management will be providing all mechanical and physical protection required for personal safety and health.

Employees are continuously made aware of the importance of safety in the work environment

Individual Cooperation Necessary

AL SULAITEEN GARDENS maintains a health program conforming to the best practices in our field.

Safety Program Goals

The objective of **AL SULAITEEN GARDENS** is a safe and healthy environment that will reduce the number of injuries and illnesses to an absolute minimum.

Safety Policy Statement

It is equally the duty of each employee to accept and follow established safety regulations and procedures.

Every effort will be made to provide adequate training to employees. However, if an employee is ever in doubt about how to do a task safely, it is their duty to ask a qualified person for assistance. Employees are expected to assist management in accident presentation.

Every injury that occurs on the job must be reported to management and / or the Responsible Safety Officer as soon as possible. An end of the day clear-up should be part of the working routine.

All rubbish, especially consumable materials such as packaging waste should be cleared daily to safe external storage.

SITE SAFETY REQUIREMENTS

All the employees and visitors must attend site safety induction before entering the site for the first time.

- All operatives are enforced to wear proper personal protective equipment (PPE) shall be well informed about the risk.
- All plant equipment must be in good working condition and inspected prior to use on site.
- All plant and equipment shall be operated by trained operations only.
- Banks men are to control the movement of the plants at site.

- When handling and spreading fertilizer / compost workers should wear gloves, safety shoes or any other Personal Protective Equipment (PPE).
- Eating, drinking or smoking while handling fertilizer / compost is not allowed.

HAZARDOUS CHEMICAL STORE

All hazardous chemicals such as pesticides, fungicides and herbicides must be kept in a separate storeroom which can be locked and is constructed in such a manner as to be isolated from other rooms via roof space or ventilation points. Exposure to volatile gasses released from open containers is potentially very dangerous. Ideally, it should be possible to purge the air in the store rooms prior to entry.

The chemical inventory must be controlled by a designated person. Hazardous data sheets must be readily available. Persons using chemical must be adequately trained to work to laid down safe working procedures.

SAFE SYSTEMS OF WORK AND SIGNAGE

Signs should indicate hazardous substances on the site.

Only individuals with a **Pest Control Officer Certificate (PCO)**, are to mix any chemicals / fertilizers or pesticides. Any individuals spraying these harmful substances must be provided with the relevant safety clothing.

All appropriate steps should be taken with the aim of ensuring that the workplace procedures and processes do not pose any foreseeable risk to the health and safety of employees. Where reasonably practicable, hazards should be removed by altering the procedures and process, but if this cannot be achieved, operating procedures should be reviewed.

Storage of finished products, packages and raw materials should be in conformity with good housekeeping principles and practices. Blending and filling operations should be performed in conformity with defined safety operating procedures.

Maintenance activities, by their nature, involve a wide variety of hazards, many of which are well recognized and may be subject to legislative controls. The company requires the demonstration of competence by those engaged in certain work activities.

FIRST AID KIT

Every site must have a proper equipped first aid kit. Where there are more than fifty (50) employees, a first aider is appointed or assurance that there is adequate first aid assistance on the site.

A designated person is responsible for the FIRST AID box.
Signs are affixed to show where the first aid boxes are.

PLANNING

The company formulates plan to fulfil its safety and health policy as set out in the Safety Statement. An effective management structure and arrangements should be put in place for delivering the policy. Safety and health objectives and targets should be set for all managers and employees.
